I. INTRODUCTION

This report presents the findings of the San Marcos Community Outreach survey conducted during the months of January and February of 2008. This report is the eight consecutive survey of its kind that the City of San Marcos has conducted regarding the attitudes of its citizens toward the City's services. The lists of survey years on all tables in the report show no survey for the calendar year of 2007. That is because the previous surveys were conducted toward the end of the year whereas the 2007 was pushed two months forward into the beginning of 2008. In other words, except for a few months of delay in conducting the current survey, there has been no interruption in our annual surveys. Hence, from here on we will refer to the current survey as 2007/08 survey.

For purposes of comparison, this report includes findings from the previous seven annual surveys. The survey instrument includes five major sections. In the first section, respondents are asked to rate their level of satisfaction with various services that are provided by the City. To a large extent, the results for this section represent the end-ofthe-year grades that residents assign to various city services. The results will also help direct the attention of the City administrators to services that need improvement. Next, residents are asked to indicate the importance they place on various issues of growth for the City. The third major section of the survey asks citizens to prioritize the community issues they consider most important. Identifying citizens' priorities offers valuable information to the City Council and City administrators as they set priorities and make important decisions about where to direct community resources. In the fourth section of the survey, respondents are asked how they feel about issues of empowerment. The City officials of San Marcos are very interested in knowing if residents are satisfied with their own level of involvement and their level of access to city information and services. The final section of the survey is devoted to a number of demographic questions. The purpose of this section is not to identify respondents but to break the aggregate findings of the study into demographic groups. Examining the attitudes of various demographic groups can help city policy makers and administrators recognize the needs and concerns of various groups in San Marcos.

Community Outreach Survey: 2007/8

The City of San Marcos has adopted the type of survey that expands democratic ideals beyond the normal electoral process. This survey allows the public to express its views of the City's unelected public officials performance as well as convey its preferences for various policy choices. Surveys of this kind promote a healthy civic engagement that is necessary in any democratic process. In short, this survey takes the democratic process to the streets of San Marcos.

This annual survey assesses the attitudes residents hold about the future direction of the City, and their perception of how adequately the City provides these services. To provide City officials and the public with a comparative perspective, similar surveys are conducted every year. Over the years, minor refinements have been made to the existing survey. For example, a new question was added at the end of the first section of the 2005 survey. This question asked residents who rated any City services as less than "Good" to explain their concerns. These explanations can provide valuable insight to city administrators. For the most part, the current survey, dated 2007/08, is identical to the 2006 survey, the last survey the City conducted. The few minor changes made to the current survey are all in the first section of the questionnaire. To start with, the order of the first 34 questions has been changed from an alphabetical order to an order that groups relevant services together. Second, one question has been dropped (Food Services) and one question has been added (Bicycle Lanes and Routes) to the list of questions at the beginning of the survey. Finally, to clarify some of the questions, the wording of a few questions has been changed. The former question of "Support of Social Services Programs" now reads "City Financial Support of Social Services Programs". Similarly, "Neighborhood Services" has been changed to "Code Enforcement", and the 2006 question of "Growth Management" now reads "Development Permitting".

The City is now placing as much information as is legally and practically possible on its web site (http://www.ci.san-marcos.tx.us/), including this report.

II. EXECUTIVE SUMMARY

The findings of this survey provide information that local leaders need to improve the management of the City. Not only do the results help identify service delivery areas that need more attention, but more importantly, these results can be considered an annual progress report of service delivery. The results of these annual investigations allow city officials to make decisions that are democratic in nature and responsive to community concerns by identifying the needs, concerns and the interests of the public,.

The findings of this survey are presented in various tables and figures that follow. A synopsis of these findings is presented in bulleted form starting on the next page. For comparative purposes, the findings of previous years and the results of the current survey, 2007/08, are presented together wherever it is appropriate. Tables 3 and 4 present the demographic distribution of respondents. Tables 5 and 6 show the ratings city services earned in the current year and in the previous seven years. Comparing current results with those of the last seven surveys provides a longitudinal perspective of citizens' perception toward the management of the City. A large portion of this report is devoted to the comparative analysis of attitudes within each demographic group. For example, Tables 7 through 15, show whether there are differences of opinion toward the City's services within each demographic group.

Tables 16 and 17 present a seven-year comparison of attitudes towards the management of growth in the City. Tables 18 through 26 show differences in the attitudes held by residents of varying demographics, towards the management of growth. The top 15 priorities of San Marcos residents, in general, as well as the priorities of each demographic group are presented in Table 27. This table shows the 15 priorities of Texas State University students, non-student residents, homeowners, long-term residents, and ethnically White and non-White residents. Four questions relating to the empowerment of citizens and attitudes toward community outreach are analyzed in Tables 29 through 39.

Since 2003, the survey has contained a set of questions soliciting information on citizens' use of the Internet and the likelihood of citizens using e-government services that might be offered by the City. The last two tables of this report present the general attitudes of citizens toward these questions.

A wealth of knowledge about the affairs of the City can be extracted from the tables and figures of this report. The following is a list of the most significant general findings.

- The survey generated many constructive comments from respondents.
 Respondents made comments such as "I love San Marcos", "I feel fortunate to live in San Marcos", and "I am very happy in San Marcos. It is a beautiful, safe and friendly community".
- Generally, residents are satisfied with the level of services they receive from
 the City. The services receiving the highest levels of citizen satisfaction are
 "Library Programs and Services", "Fire Services", "Garbage Pickup", "Parks/
 Facilities/ Open Space", and "Recreational Programs".
- Services with the lowest levels of citizen satisfaction are "Bicycle Lanes and Routes", "Downtown Parking", "Sidewalks", and "Downtown Redevelopment".
- Services that have had the sharpest improvement in their ratings within the last year are: "Drainage Utility", "Traffic Control (signs and signals)", "Police Services", "Municipal Court" and "Garbage Pickup".
- Services that have had the sharpest decline in their ratings within the last year are: "Downtown Redevelopment", "Municipal Airport" and "Planning and Development Services".
- Except in 9 of the service areas, we have found no difference of satisfaction between the homeowners and the non-homeowners. Non-home owning residents are significantly more satisfied with the following 9 services than are homeowners.
 - City Government

- Boards and Commissions
- Financial Management of City
- Code Enforcement
- Downtown Parking
- Economic Development
- Planning and Development Services
- Development Permitting
- Drainage Utility
- In 8 areas of service delivery, there are significant differences in the satisfaction levels of Texas State University students and other residents.
 Texas State students are less satisfied with these services than other residents.
 These services are:
 - Financial Management of City Funds
 - Animal Control Services
 - Library Programs & Services
 - Fire Services
 - Police Services
 - Recreational Programs
 - Electric Services
 - Garbage Pickup
 - Generally, residents are not very satisfied with downtown parking. Homeowners, long-term residents (those who have lived in San Marcos for more than 20 years) and those residents whose annual income is greater than \$65,000 are particularly less satisfied with this service.
 - Residents who are older than 25 are significantly more satisfied with the following services than residents who are younger than 25.
 - Library Programs & Services
 - Police Services
 - Parks/ Facilities/ Open Space
 - Recreational Programs

- Electric Services
- Customer Services at Utility Payment Center
- Garbage Pickup
- Homeowners and residents whose gross annual income is between \$35,000 to \$50,000 are significantly less satisfied with the performance of the City's Boards and Commissions when compared to non-homeowners and other income groups.
- Homeowners, younger residents (25 years of age or younger), and residents with an annual gross income of greater than \$65,000 are more than other groups displeased with the performance of the City's development permitting.
- The three most important growth issues for the residents of San Marcos are:
 - 1. Protection of Environment
 - 2. Solving Traffic Problem
 - 3. Keeping the Town Attractive
- Annexation of the surrounding areas is more important for residents who are not Texas State students and are non-White.
- Table 27 of this report presents the priority-rankings made by the general
 public and the various demographic groups. Table 28 presents a list of the
 priorities identified by residents and the frequencies of these priorities.
 Below is a list of the top five priorities identified by respondents.
 - 1. Solving Traffic Problems
 - 2. Econ. Growth, Bus. Opportunities & Jobs
 - 3. Taxes, Fees, Charges
 - 4. Roads/Streets/Routes Maintenance, Sidewalks, Bike Routes
 - 5. Police & Crime Prevention
- Homeowners and long-term residents (those who have lived in the City for more than 20 years) are most satisfied with their level of involvement with City government.

- About 68% of Texas State University students are satisfied with the information they receive form the City and the access they have to City government and services.
- Over the years, more and more residents have accessed the City's web site. The current survey, 2007/08, shows that about 62% of the residents have accessed the web site. The most requested services for the City's website are:
 - Online Bill Pay and Account Information
 - Information on City Services and Departments
 - Events, Activities and Election Information
 - Comments and Suggestion Section

III. METHODOLOGY

This report presents the findings of the eight annual survey conducted by the City of San Marcos since 2000. The survey instrument used for this report began with an opening paragraph that provided proper instructions for answering the questions. The opening paragraph assured the respondents of anonymity and directed attention to the Spanish version of the survey. In order to reach the growing Hispanic population of San Marcos, both English and Spanish versions of the instrument were developed and mailed out to all randomly selected residents. Both English and Spanish versions of the current survey are included in the Appendix of this report.

A list of randomly selected addresses from the City's utility records was prepared and used as the representative sample of the general population of the City. A private vendor printed the surveys, printed addresses on the envelopes and mailed the questionnaires. On January 15, 2008 the vendor mailed out 3,279 envelopes. Mailed envelopes included both English and Spanish versions of the survey, along with postage-paid return envelopes addressed to Dr. Tajalli.

As shown in Table 1, 302 surveys were returned. The overall response rate for the current survey is 9.21%. Table 2 provides the margin of errors for the current survey as well as for the last seven surveys. The margin of error helps to generalize sample results to a wider population. For example, we can be sure, with 95% confidence that the current attitudes of the City's residents is within the \pm 5.7% range of the 2007/08 percentages that are presented in the following pages.

This report presents the results of a survey conducted among the residents of San Marcos. The results for each section of the survey are first presented in aggregate form. The aggregate results represent the opinions of all respondents. These results are summarized in various tables at the beginning of each section. Following the aggregate results for the entire sample of respondents, the data are reanalyzed for each demographic group. The intent is to find out if there are differences of opinion among the various demographic

groups. We have used the "Chi-Square Test for Independence" to determine if relationships exist between the opinions of the citizens and their demographic characteristics. Results of the chi-square tests are presented in various tables throughout the report. Following each chi-square table, an itemized description of the findings is presented. A summary description of the chi-square test is presented in the Appendix to this report.

Table 1 Accounts of the Sample Survey

Survey Year	Mailed Out	Response Rate	
2007/08	3,279	302	9.21%
2006	3346	305	9.12%
2005	2716	321	11.80%
2004	3015	462	15.30%
2003	2525	431	17.10%

Description of the findings for this table is presented on the next page.

Table 7 Findings:

- Generally residents who live in rental places are significantly more satisfied with the following services than homeowners.
 - City Government (#1)
 - Boards and Commissions (#2)
 - Financial Management of City (#3)
 - Code Enforcement (#9)
 - Downtown Parking (#15)
 - Economic Development (#17)
 - Planning and Development Services (#20)
 - Development Permitting (#23)
 - Drainage Utility (#32)
- No other significant relationship was found between homeownership and the attitudes of residents toward city services.

Description of the findings for this table is presented on the next page.

Table 8 Findings:

- Respondents who live inside San Marcos' City limits are significantly more satisfied with Water Utility (#30), Drainage (#32), and Garbage Pickup (#34) than those who live outside the City limits.
- No other significant relationship was found between the attitude of the respondents and whether they live inside or outside the City limits.

Description of the findings for this table is presented on the next page.

Table 11 Findings:

- Residents who have lived in San Marcos for more than 10 years are significantly less satisfied with the general performance of the city government (#1) than others are.
- Residents with less than three years of residency are significantly more satisfied with downtown parking (#15) than other residents.
- No other significant relationship between respondents' length of residency in the area and their satisfaction with city services was found.

Description of the findings for this table is presented on the next page.

Table 12 Findings:

- Residents who are older than 25 are significantly more satisfied with the following services than residents who are 25 years of age or younger.
 - Library Programs & Services (#6)
 - Police Services (#12)
 - Parks/ Facilities/ Open Space (#13)
 - Recreational Programs (#14)
 - Electric Services (#31)
 - Customer Services at Utility Payment Center (#33)
 - Garbage Pickup (#34)
- Residents who are older than 40 are significantly more satisfied with Municipal Court (#8) than residents who are 40 years of age or younger.
- Residents who are between the ages of 26 and 40 are significantly more satisfied with development permitting (#23) than residents of other age groups.
- No other significant relationship between respondents' age and their satisfaction with city services was found.

Description of the findings for this table is presented on the next page.

Table 13 Findings:

- Large family households (with more than 4 members) are significantly less satisfied with animal control services (#5) than other residents.
- Generally, residents are very satisfied with library programs and services (#6). However, households are significantly more satisfied with this service than single residents.
- No other significant relationship between residents' household size and their satisfaction with city services was found.

Description of the findings for this table is presented on the next page.

Table 15 Findings:

- Residents whose gross annual income is between \$35,000 to \$50,000 are significantly less satisfied with performance of City Government (#1), Boards and Commissions (#2), Planning and Development Services (#20), and Drainage Utility (#32) than other income groups are.
- Generally, residents are *very* satisfied with the library programs and services. However, residents whose gross annual income is between \$35,000 to \$50,000 are significantly more satisfied with this service (#6) than other income groups are.
- Generally, residents are not very satisfied with downtown parking (#15). Residents with a gross annual income of greater than \$65,000 are particularly unhappy with this service.
- Generally, residents are not very satisfied with downtown redevelopment (#16). However, residents with a gross annual income of less than \$20,000 are significantly more satisfied with this service than other income groups are.
- Residents with a gross annual income of \$35,000 or less are significantly more satisfied with development permitting (#23) than other income groups are.
- Generally, residents are not very satisfied with traffic control (signs and signals) (#25). Residents with a gross annual income of more than \$50,000 are particularly less satisfied with this service than other income groups are.
- No other significant relationship between residents' gross annual income and their satisfaction with city services was found.

Table 19 Relationship Between the Attitudes Toward Managing Growth and Residency

(Percent Responding "High Importance" or "Most Importance")

	Residency				
	%	%	chi-		
	In-city	Out-city	square†		
1. Annexation of surrounding areas	39.6	27.6	1.53		
2. Keeping tax rates low	77.8	69.7	1.05		
3. Keeping the town attractive	80.9	81.1	0.00		
4. Preventing urban sprawl	65.7	65.7	0.00		
5. Protection of existing neighborhoods	77.9	72.2	0.56		
6. Protection of the environment	86.3	75.7	2.82		
7. Providing affordable housing	72.5	65.7	0.69		
8. Providing economic opportunities/ jobs for residents	80.0	72.2	1.13		
9. Providing parks and open space	79.7	73.7	0.70		
10. Solving traffic problems	83.1	73.7	1.93		

^{*} Significant at $\alpha < .05$

Finding:

 There are no significant relationships between the importance respondents place on the City's management of growth and whether the respondent reside inside San Marcos' city limits or not.

^{**} Significant at α < .01

[†] See the appendix for the description/explanation of chi-square

Table 20 Relationship Between Attitudes Toward Managing Growth and whether the Person is a Texas State University Student or Not

(Percent Responding "High Importance" or "Most Importance")

	Are you a Texas State				
	U	Univ. student?			
	%	%	chi-		
	Yes	No	square†		
1. Annexation of surrounding areas	22.5	40.8	4.66*		
2. Keeping tax rates low	71.7	78.4	0.96		
3. Keeping the town attractive	77.4	81.9	0.56		
4. Preventing urban sprawl	62.2	66.1	0.25		
5. Protection of existing neighborhoods	64.7	79.5	5.03*		
6. Protection of the environment	90.4	82.9	1.76		
7. Providing affordable housing	71.4	72.6	0.03		
8. Providing economic opportunities / jobs for residents	73.6	80.9	1.37		
9. Providing parks and open space	87.0	75.7	3.23		
10. Solving traffic problems	79.6	82.7	0.28		

^{*} Significant at $\alpha < .05$

Findings:

- Generally, residents do not place high importance on annexation of surrounding areas (#1). However, residents who are not Texas State students place significantly higher importance on this issue than Texas State students do.
- Residents who are not Texas State students place significantly higher importance on protection of existing neighborhoods (#5) than Texas State students do.
- No other significant relationship was found between the importance residents place on the City's management of growth and whether they are Texas State students or not.

^{**} Significant at $\alpha < .01$

Table 21 Relationship Between Attitudes Toward Managing Growth and Marital Status

(Percent Responding "High Importance" or "Most Importance")

	Are you married?			
	%	%	chi-	
	Yes	No	square†	
1. Annexation of surrounding areas	37.1	39.6	0.15	
2. Keeping tax rates low	77.9	75.8	0.17	
3. Keeping the town attractive	84.7	77.3	2.40	
4. Preventing urban sprawl	67.5	63.4	0.43	
5. Protection of existing neighborhoods	76.1	77.5	0.07	
6. Protection of the environment	81.2	87.9	2.26	
7. Providing affordable housing	70.2	74.2	0.51	
8. Providing economic opportunities / jobs for residents	78.0	80.2	0.18	
9. Providing parks and open space	77.2	79.1	0.14	
10. Solving traffic problems	82.3	82.2	0.00	

^{*} Significant at $\alpha < .05$

Findings:

• There are no significant relationships between the importance respondents place on the City's management of growth and whether they are married or not.

^{**} Significant at α < .01

[†] See the appendix for the description/explanation of chi-square

Table 22
Relationship Between Attitudes Toward
Managing Growth and Length of Residency

	Length of Residency					
	< 3	3-10	11-19	> 20	chi-	
	years	years	years	years	square†	
1. Annexation of surrounding areas	24.4	35.5	40.0	45.7	5.76	
2. Keeping tax rates low	79.2	69.1	81.3	80.2	3.82	
3. Keeping the town attractive	81.4	84.3	75.8	81.3	1.17	
4. Preventing urban sprawl	60.0	64.9	59.3	73.3	3.41	
5. Protection of existing neighborhoods	75.9	78.5	78.1	76.0	0.21	
6. Protection of the environment	89.8	87.8	81.3	78.7	4.55	
7. Providing affordable housing	77.2	66.3	64.5	74.2	3.04	
8. Providing economic opportunities / jobs for residents	70.2	80.2	75.8	84.0	4.38	
9. Providing parks and open space	81.4	82.1	87.9	68.8	7.88*	
10. Solving traffic problems	80.0	77.6	85.3	85.9	2.50	

^{*} Significant at $\alpha < .05$

Findings:

- The provision of parks and open space (#9) is very important to residents regardless of their length of residency in San Marcos.
 However, those residents who have lived in the City for less than 20 years place significantly higher importance on this issue than the longterm residents do.
- No other significant relationship was found between the importance residents place on the City's management of growth and their length of residency in the area.

^{**} Significant at α < .01

[†] See the appendix for the description/explanation of chi-square

Table 23
Relationship Between Attitudes Toward
Managing Growth and the Age of Respondents

	Age of Respondent					
	<	26	41	>	chi-	
	=	to	to	=		
	25	40	64	65	square†	
1. Annexation of surrounding areas	34.5	36.2	41.2	38.9	0.56	
2. Keeping tax rates low	72.2	70.9	85.4	68.8	8.00*	
3. Keeping the town attractive	72.5	81.7	84.5	81.3	2.72	
4. Preventing urban sprawl	67.7	62.3	63.5	73.2	1.93	
5. Protection of existing neighborhoods	66.7	84.5	75.0	79.7	4.67	
6. Protection of the environment	92.5	95.0	78.2	80.6	10.90*	
7. Providing affordable housing	69.2	67.9	77.5	68.3	2.53	
8. Providing economic opportunities / jobs for residents	77.5	71.9	83.3	79.0	2.92	
9. Providing parks and open space	87.8	85.2	75.7	71.4	6.12	
10. Solving traffic problems	78.0	82.0	85.6		2.06	

^{*} Significant at $\alpha < .05$

Findings:

- Generally, residents place high importance on both low tax rates (#2) and protection of the environment (#6). Residents whose age is between 41 and 64 years place the highest importance on the former and the least importance on the latter when compared to other age groups.
- No other significant relationship was found between the age of respondents and the importance they place on the City's management of growth.

^{**} Significant at $\alpha < .01$

[†] See the appendix for the description/explanation of chi-square

Table 24
Relationship Between Attitudes Toward
Managing Growth and Household Size

		Size of 1	Householo	ì
	Single	2 to 4	More than 4	chi- square†
1. Annexation of surrounding areas	35.3	40.6	33.3	0.52
2. Keeping tax rates low	72.6	78.7	71.4	1.02
3. Keeping the town attractive	77.3	83.1	100.0	2.66
4. Preventing urban sprawl	65.5	64.7	83.3	0.88
5. Protection of existing neighborhoods	79.4	74.5	100.0	2.79
6. Protection of the environment	82.1	86.0	100.0	1.81
7. Providing affordable housing	73.4	72.5	71.4	0.03
8. Providing economic opportunities / jobs for residents	76.6	80.8	71.4	0.76
9. Providing parks and open space	75.4	81.8	71.4	1.47
10. Solving traffic problems	84.8	81.9	85.7	0.33

^{*} Significant at $\alpha < .05$

Findings:

• There are no significant relationships between the importance respondents place on the City's management of growth and size of their household.

^{**} Significant at α < .01

[†] See the appendix for the description/explanation of chi-square

Table 25 Relationship Between Attitudes Toward Managing Growth and Ethnicity

(Percent Responding "High Importance" or "Most Importance")

		Ethnicity	
	%	%	chi-
	White	Minority	square†
1. Annexation of surrounding areas	33.1	60.9	11.36**
2. Keeping tax rates low	78.9	70.2	1.84
3. Keeping the town attractive	82.6	76.3	1.17
4. Preventing urban sprawl	66.9	68.8	0.06
5. Protection of existing neighborhoods	76.4	85.7	2.22
6. Protection of the environment	85.1	86.7	0.09
7. Providing affordable housing	70.8	80.4	1.98
8. Providing economic opportunities / jobs for residents	77.2	84.2	1.27
9. Providing parks and open space	80.9	72.6	1.91
10. Solving traffic problems	84.0	77.4	1.37

^{*} Significant at $\alpha < .05$

Findings:

- Annexation of surrounding areas (#1) is significantly more important for non-White residents than is for the White residents.
- No other significant relationship was found between the race/ethnicity
 of respondents and the importance they place on the City's
 management of growth.

^{**} Significant at α < .01

[†] See the appendix for the description/explanation of chi-square

Table 26
Relationship Between Attitudes Toward
Managing Growth and Gross Annual Family Income

	Gross Annual Family Income						
	< \$20K	\$20K to \$35K	\$35K to \$50K	\$50K to \$65K	> \$65K	chi- square†	
1. Annexation of surrounding areas	35.9	52.1	32.0	50.0	31.8	6.96	
2. Keeping tax rates low	75.0	73.2	83.9	77.1	78.4	1.48	
3. Keeping the town attractive	69.1	87.9	91.2	81.1	79.5	9.26	
4. Preventing urban sprawl	58.0	72.9	67.9	61.8	67.1	2.78	
5. Protection of existing neighborhoods	73.6	86.2	87.9	69.4	72.2	7.49	
6. Protection of the environment	92.9	89.7	87.5	86.1	77.8	7.02	
7. Providing affordable housing	85.2	76.8	81.3	55.6	66.7	12.62*	
8. Providing economic opportunities/ jobs for residents	89.3	81.8	78.1	69.4	75.0	6.58	
9. Providing parks and open space	82.5	79.3	78.8	91.9	71.6	6.63	
10. Solving traffic problems	80.7	86.7	77.1	78.4	85.3	2.40	

^{*} Significant at $\alpha < .05$

Findings:

- Residents whose gross annual income is between \$50,000 and \$65,000 place significantly less importance on providing affordable housing (#7) than other income groups do.
- No other significant relationship was found between the gross annual income of respondents and the importance they place on the City's management of growth.

^{**} Significant at α < .01

- The Chi-Square Test for Independence: A Note on Statistics
- Survey Instrument: English
- Survey Instrument: Spanish
- Map of the City

THE CHI-SQUARE TEST FOR INDEPENDENCE: A NOTE ON STATISTICS

The "chi-square test for independence" is a statistical procedure used to test whether or not there is a relationship between two variables. The chi-square examines distribution of groups in a sample to identify relationships in the general population. In this report, the chi-square statistic is used to test whether or not the attitudes of the residents vary across demographic groups/regions of the city.

- Whenever the attitudes of residents vary across demographic groups/regions, the chi-square is marked by one or two asterisks.
- Asterisks represent level of significance. Level of significance (1) is simply a probability value that is used to define the term *very unlikely*.
- If there is no difference of attitudes across demographic groups/regions, the chi-square has no asterisk marking.
- One asterisk represents less than 5% probability that there is no relationship between the attitude and the demographic/region variable. In this case, there is over 95% probability that there is a relationship between the attitude and the demographic/region variable.
- A chi-square marked by two asterisks indicates that there is over 99% probability that there is a relationship between attitude and the demographic/region variable.

City of San Marcos Community Survey

Your name was randomly selected. Your responses are important. Please return your completed survey by *Friday*, *February 15*, 2008.

Please take a few minutes to complete the following questions and return in the enclosed postage paid envelope. This brief survey will allow us to evaluate City services, collect public opinion on growth, and measure our community outreach effectiveness. You do not need to identify yourself and the survey is completely anonymous. Your mailed survey will be collected by a professor at Texas State University for analysis and report. Thank you in advance for your time and consideration. (Si usted desea llenar la encuesta en Español, una traduccion se encuentra en el sobre)

Ciudad de San Marcos Encuesta de la Comunidad

¡SU voz es importante!

Su nombre fue seleccionado aleatoriamente. Sus respuestas son importantes. Vuelva por favor su examen terminado antes del viernes 15 de febrero de 2008.

Por favor, tome unos minutos para completar las siguientes preguntas y regrese esta encuesta en el sobre, este sobre tiene el postal prepagado. Esta breve encuesta nos permitira evaluar los servicios en la Ciudad, tambien conjuntar la opinión pública en relación al crecimiento de la Ciudad y asimismo, medir nuestro alcance y eficacia en la comunidad. Usted no necesita identificarse, esta encuesta es completamente anónima. Los resultados serán submitidos a la Universidad de Estado de Tejas-San Marcos para un estudio y reporte. Gracias por adelantado por su tiempo y consideración. (An English translation is enclosed if you wish to fill out the survey in English)
